Knauf Access Panels

Knauf for quality and functionality

The new Knauf Access Panel Series!

Knauf Drywall Systems offer slim, cost effective solutions with maximum architectural sophistication and functionality. Installers approve as total priority is given to fulfilling all the structural and physical requirements in buildings, a pre-requisite in the installation of Knauf Access Panels.

The choice of Knauf access panels for systems with panelling from 12,5 to 25 mm, with sizes varying from a minimum of 200 x 200 mm up to a maximum of 1200 x 1200 mm, depends on the type of board paneling. Expectations of various kinds can be fulfilled with or without any particular fire protection requirements. With a great deal of variety, every level of installation from the sanitary plumbing to the electrical service cables becomes readily accessible, simple, and safe.

What is an Access Panel?

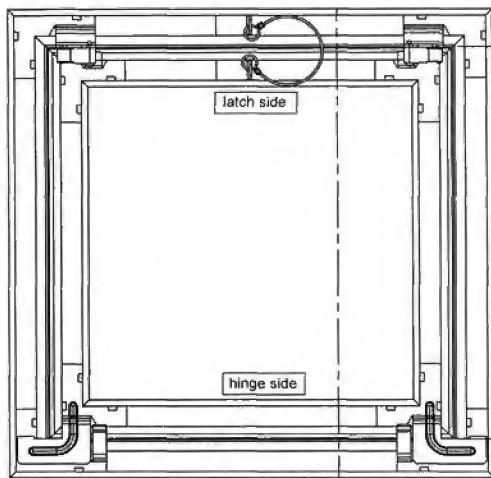

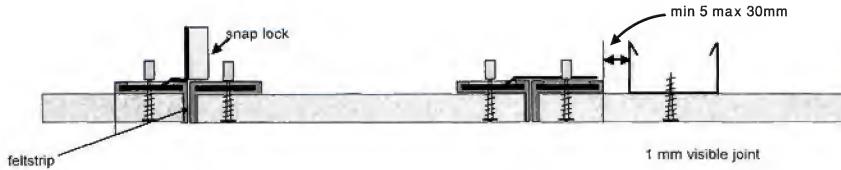

Access panels are gypsum based built-in accessories for drywall systems. They are planted in various areas of the drywall partitions, shaftwalls or suspended ceilings that requires access for constant adjustments, inspections and revisions. Ventilation ducts, electrical control outlets, pipes and valves can be given as an example to these areas.
